SERVICES

- NON-FERROUS METALS
- STEELS
- ENGINEERING PLASTICS
- STEEL CASTING, GRAY IRON CASTING
- INDEPENDENT PRODUCT INSPECTION

PRODUCTS

ENGINEERING PLASTICS

Polyethylene (PE 1000)
POM (Delrin)
Cast Polyamide
PVC (Polyvinyl Chloride)
Fiberglass
PEEK (Polyether Ketone)
Polyamide (Nylon)
PET

STEELS

General Steels
Tool Steels
Stainless Steels
Gray Cast Iron
Steel Castings

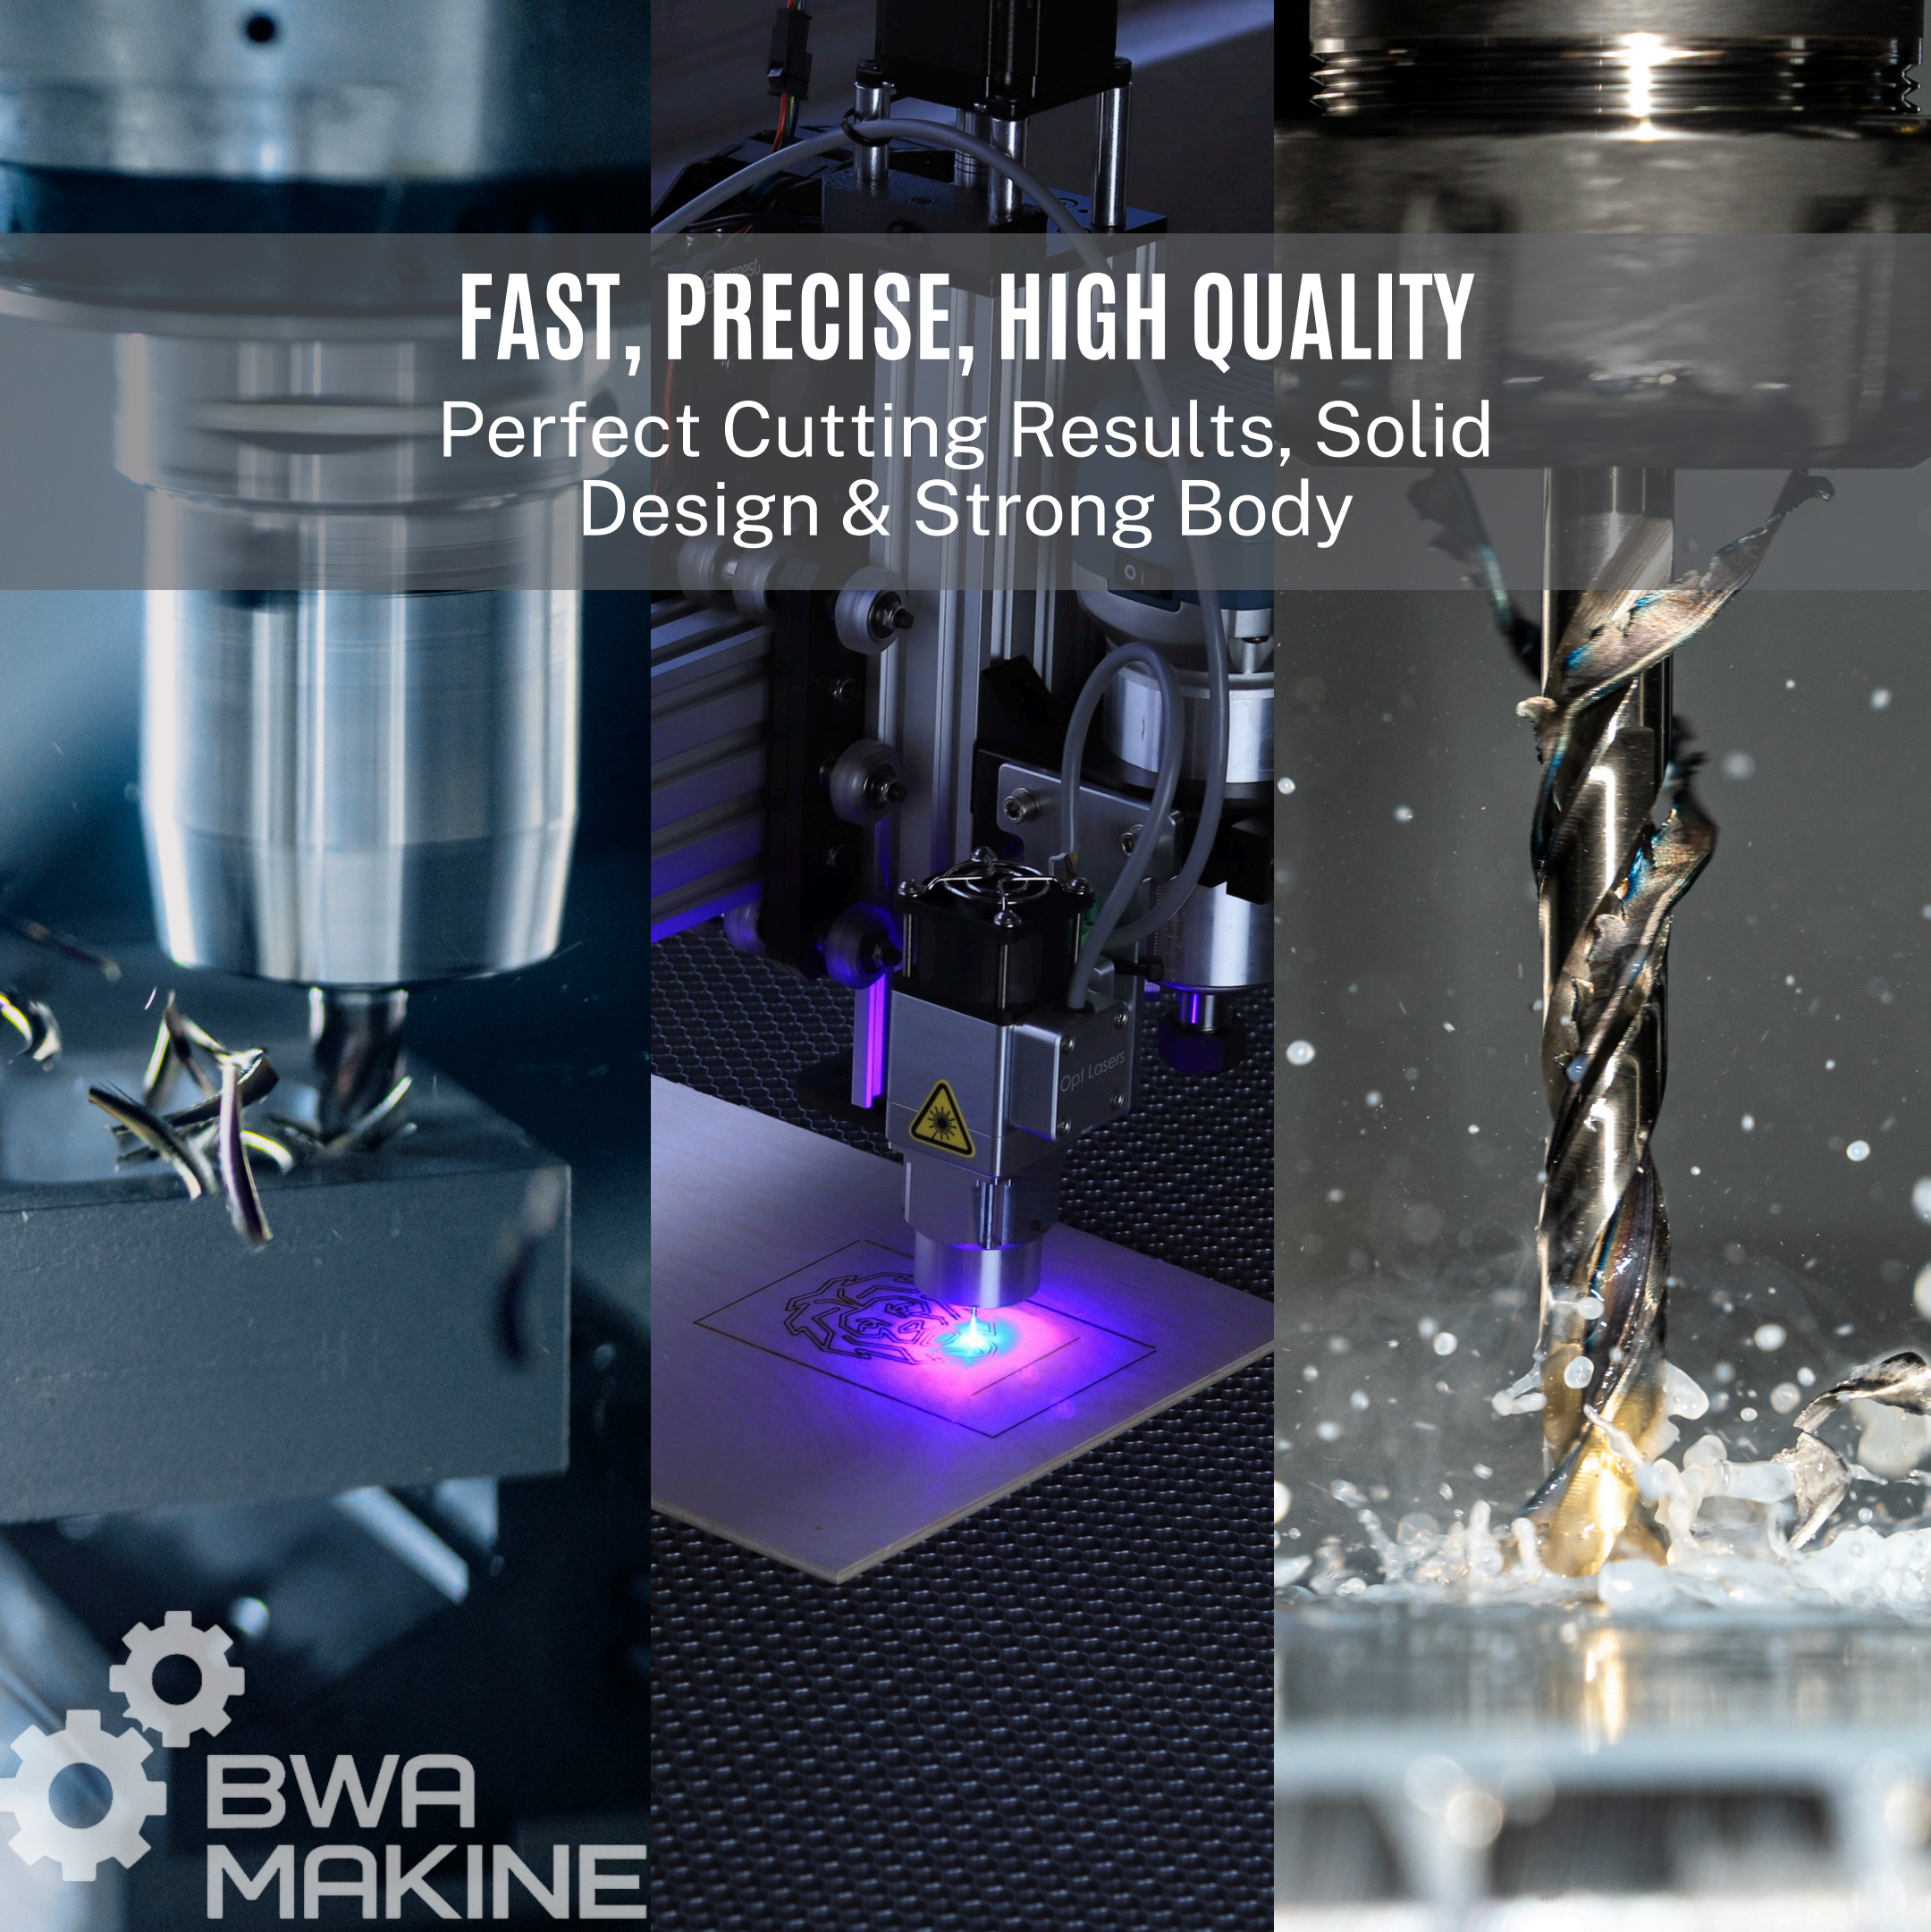

NON-FERROUS METALS

Brass
Bronze
Copper
Aluminum

Copper and Copper Alloys
Nickel and Nickel Alloys
Aluminum
Tin and Tin Alloys
Zinc and Zinc Alloys

**CUTTING-BENDING
ACCORDING TO
DESIRED GRADE**

FAST, PRECISE, HIGH QUALITY
Perfect Cutting Results, Solid
Design & Strong Body

ABOUT US

Our company is a leading organization in the field of machine and industrial spare parts manufacturing, prioritizing quality and reliability. With years of experience and sector-specific expertise, we offer innovative, efficient, and high-quality solutions to our customers.

Through our contract manufacturing and custom production services, we develop tailored solutions for the needs of various industries, addressing each project with a unique approach to meet our customers' expectations at the highest level.

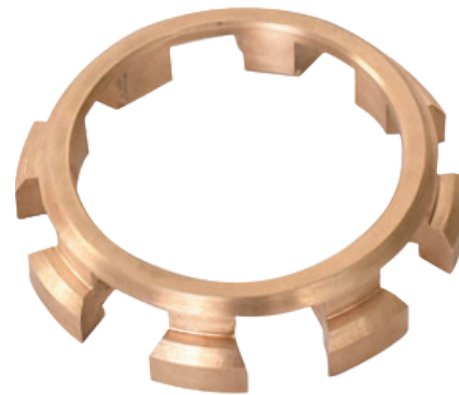

What We Offer: Machine Spare Part Manufacturing

We produce high-durability parts that meet precision manufacturing standards for industrial machines.

Industrial Spare Part Manufacturing

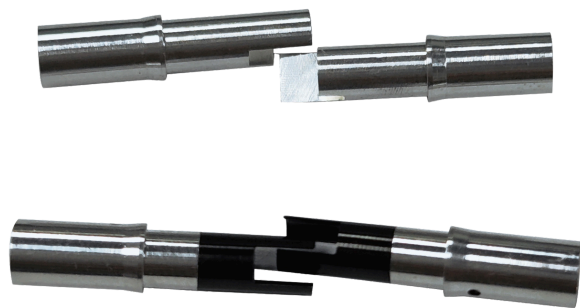

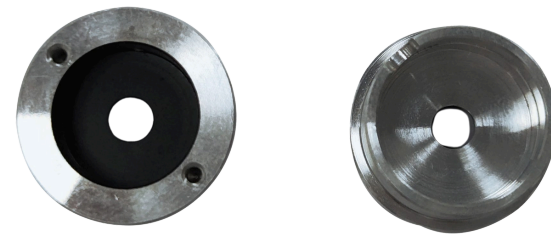

We develop custom solutions for a variety of industrial parts required by different sectors.

PRODUCTS

Custom CNC Machined Parts
Our OEM/ODM CNC machining solutions are tailored for hardware components, manufactured with high precision to meet specific customer requirements. With broad production capabilities, we deliver efficient solutions for projects of all sizes.

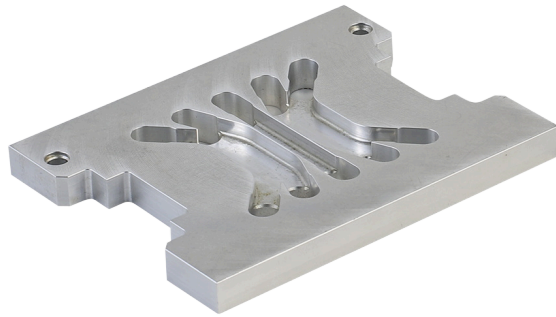

PRODUCTS

Materials & Surface Finishes

We work with durable materials such as aluminum, copper, and stainless steel, enhancing each part with surface finishes like anodizing, electroplating, sandblasting, and polishing. This ensures both long-lasting durability and a refined appearance.

PRODUCTS

Machining Capacity
Equipped with advanced CNC machining and turning systems, we can process parts up to 2600 mm in length. This extended capacity allows us to confidently meet the demands of large-scale and complex component needs across various industries.

WHY CHOOSE US

✓ **Custom Manufacturing Services:**

Flexible and customizable production solutions developed specifically to meet our customers' needs.

✓ **Quality and Reliability:**

All of our production processes are continuously monitored by quality control systems and comply with international standards.

✓ **Technology and Innovation:**

With state-of-the-art manufacturing equipment and ongoing R&D investments, we always stay one step ahead.

✓ **Customer Satisfaction-Oriented Approach:**

We ensure lasting satisfaction through quick response to needs, on-time delivery, and sustainable partnerships.
